ENVIRONMENTAL POLICY

We are committed to measuring the environmental impact of our activities and improving our performance in line with our set targets, reducing the negative impact of our operations on the environment, complying with environmental regulations and the standards we adopt, defining the roles and responsibilities necessary for the implementation of processes, providing the required resources, enhancing sustainable environmental awareness and consciousness among our business partners, suppliers, and throughout our value chain, and continuously improving our environmental management system.

in this context, we are committed to:

Assess our environmental responsibility within the scope of our activities, ensuring full compliance with legal regulations while adopting applicable standards beyond legal requirements for environmental protection,

Prioritize the efficient management of resources, monitoring all activities related to the use of natural resources, increasing efficiency in our use of all natural resources such as water and energy, implementing practices that reduce our consumption of natural resources, adopting best practices to prevent waste generation, and improving our environmental impact,

Measure and evaluate our emission sources, reporting transparently, reducing our emissions in the context of combating climate change, and setting targets for achieving net zero emissions, aiming for 100% renewable energy use in areas of our operations where it can be applied from renewable energy sources,

Inform all our employees about our environmental impact and awareness issues, enhancing their awareness, and striving to extend our efforts in this area to our entire value chain, including our suppliers and customers, through collaborations, joint efforts, and training & awareness initiatives,

Carry out activities to enhance environmental awareness within our value chain, supporting our suppliers and business partners to improve their environmental performance and sustainable practices,

Regularly review our environmental policy and practices and update them according to changing conditions and needs.
